

How long will she be in there?
As long as she wants.

Introducing the HotSoak™ maintenance heater.

HotSoak™ is the first maintenance heater designed exclusively for soaking baths. So those who prefer the peace and quiet of a soaking bath can now bask as long as they want without adding more hot water. It is a circulation heater specifically designed to maintain the hot water temperature with virtually no water movement. HotSoak is an optional feature on most Aquatic soaking baths.

HotSoak™

Many consumers prefer the relaxation and benefits of a therapeutic soak versus the action of a whirlpool bath. The innovation of HotSoak™ offers a new alternative in hydrotherapy allowing bathers to relax in a consistently warm bath.

Simply request the HotSoak™ option when ordering your Aquatic soaking bath.
