JETTA CORPORATION TECHNICAL SPECIFICATIONS

ELECTRICAL SPECIFICATIONS:

Required Electrical Service 110/115 Volts
 Standard Whirlpool Bath 20 amp GFI
 Entire unit must be protected by a dedicated GFI breaker (refer to local codes).

CODES/STANDARDS APPLICABLE:

Specified model meets or exceeds the requirements for the following standards: UL Listed, ANSI, ASME, IAPMO.

SUGGESTED PUMP ACCESS PANEL:

20" x 12" - Actual recommended size may vary depending on distance of access to pump location.

CUT OUT DIMENSION:

Subtract 2" from edge. Contact Jetta for template.

SHIPPING WEIGHT: 270 lbs.

*L/B, R/B, L/F, R/F pump position determines suction location.

INSTALLATION: Measure tub before building tub deck. Add 1" to 3" of evenly distributed bedding compound under the base of the tub to provide maximum support. Tub should not be supported by rim in any way and should be level when installed. Jetta recommends using a quick setting concrete mix. Plastic sheeting should be laid between bedding and bath during installation. Drawing shows manufacturer's standard pump location. Optional locations available at an additional cost, depending on feasibility. Contact Jetta for details. Dimensional variance on drawings may be +/- 1/2 inch and are subject to change without notice.
